INDEX TO VOLUME XVIII

Aciduric organisms, Studies on dental caries, with special reference to, associated with this process 181
Anaerobes, Quantitative aspects of the metabolism of 157
Azotobacter chroococcum, The influence of, upon the physiological activities of cellulose destroyers 169

B. coli group, The electrophoretic potential as an aid in identifying strains of the 339
Bacteria, A continuous method of culturing, for chemical study 59
——, Observations on luminous 95
——, The fermentation of glycuronic acid by certain 133
Bacterial cells, The relative thermal death rates of young and mature 333
—— cultures, A note on the application of Buchanan's formula to heat production in 117
—— viability, The influence upon, of various anions in combination with sodium 265
Baker's yeast, The effects of certain chemical compounds upon the course of gas production by 247
Barnes, Mildred Winchester, and Burke, Victor. The cell wall and the Gram reaction 69
Bedford, Robert H. A rapid method for obtaining the Voges-Proskauer reaction 93
Branham, Sara E. The effects of certain chemical compounds upon the course of gas production by Baker's yeast 247
Buchanan's formula, A note on the application of, to heat production in bacterial cultures 117
Buchbinder, Leon, Rosebury, Theodor, and Linton, Richard W. A comparative study of dental aciduric organisms and *Lactobacillus acidophilus* 395
Burke, Victor, and Barnes, Mildred Winchester. The cell wall and the Gram reaction 69

C. diphtheriae, The influence of gaseous environment on growth and toxin production of. Studies on carbon dioxide. IV 1
Carbon dioxide, Studies on. IV. The influence of gaseous environment on growth and toxin production of *C. diphtheriae* 1
Carbon dioxide, Studies on. V. The mechanism responsible for the preserving action of carbon dioxide on diphtheria toxin 101
Cell, The, wall and the Gram reaction 69
Cellulose destroyers, The influence of *Azotobacter chroococcum* upon the physiological activities of cellulose destroyers 169

Carbon dioxide, The mechanism responsible for the preserving action of, on diphtheria toxin. Studies on carbon dioxide. V..... 101
Chapman George H. The electrophoretic potential as an aid in identifying strains of the *B. coli* group..... 339
Chemical study, A continuous method of culturing bacteria for..... 59
Churchman, John W. Gram structure of cocci..... 413
Cocci, Gram structure of..... 413
Comparative, A, study of dental aciduric organisms and *Lactobacillus acidophilus*..... 395
Continuous, A, method of culturing bacteria for chemical study..... 59
Contribution, A, to the classification of microörganisms of the class Schizomycetes..... 361

Damon, S. R., and Hampil, Bettylee. Studies on leptospirae. I. Some observations on the distribution and cultivation of leptospirae..... 343
Death rates, The relative thermal, of young and mature bacterial cells..... 333
Decreasing, The, rate of fermentation..... 207
Dental aciduric organisms. A comparative study of, and *Lactobacillus acidophilus*..... 395
—— caries, Studies on, with special reference to aciduric organisms associated with this process..... 181
Diphtheria toxin, The mechanism responsible for the preserving action of carbon dioxide on. Studies on carbon dioxide. V..... 101
Drake, E. T., Sturges, W. S., and Parsons, L. B. Quantitative aspects of the metabolism of anaerobes..... 157

Effects, The, of certain chemical compounds upon the course of gas production by Baker's yeast..... 247
Electrophoretic, The, potential as an aid in identifying strains of the *B. coli* group..... 339

Fabian, Frederick William, and Winslow, C.-E. A. The influence upon bacterial viability of various anions in combination with sodium..... 265
Fermentation, The decreasing rate of..... 207
——, The, of glycuronic acid by certain bacteria..... 133
Fermentometer, The..... 199
Filtration experiments, Observations on some of the factors involved in..... 175

Gas production by Baker's yeast, The effects of certain chemical compounds upon the course of..... 247
Glycuronic acid, The fermentation of, by certain bacteria..... 133
Gram-negative bacilli, Sodium chloride media for the separation of certain Gram-positive cocci from..... 43
Gram-positive cocci, Sodium chloride media for the separation of certain, from Gram-negative bacilli..... 43
Gram reaction, The cell wall and the..... 69
—— structure of cocci..... 413

Grinnell, Francis B. Observations on some of the factors involved in filtration experiments..... 175

Hamilton, W. B., and Sanborn, J. R. The influence of *Azotobacter chroococcum* upon the physiological activities of cellulose destroyers..... 169
Hampil, Bettylee, and Damon, S. R. Studies on leptospirae. I. Some observations on the distribution and cultivation of leptospirae..... 343
Hastings, E. G., and Thornton, H. R. Studies on oxidation-reduction in milk. I. Oxidation-reduction potentials and the mechanism of reduction..... 293
—— and ——. Studies on oxidation-reduction in milk. II. The choice of an indicator for the reduction test. The reduction of janus green B in milk..... 319
Hemolytic streptococci, The specificity of scarlatinal..... 139
Hill, Justina H., and White, Edwin C. Sodium chloride media for the separation of certain Gram-positive cocci from Gram-negative bacilli..... 43
Hill, Samuel E., and Shoup, Charles S. Observations on luminous bacteria... 95

Influence, The, of *Azotobacter chroococcum* upon the physiological activities of cellulose destroyers..... 169
——, The, upon bacterial viability of various anions in combination with sodium..... 265

Janus green B, The reduction of, in milk. Studies on oxidation-reduction in milk. II. The choice of an indicator for the reduction test..... 319

Kahn, Morton C., and Quick, Armand J. The fermentation of glycuronic acid by certain bacteria..... 133

Lactobacillus acidophilus, A comparative study of dental aciduric organisms and..... 395
Leptospirae, Some observations on the distribution and cultivation of. Studies on leptospirae. I..... 343
——, Studies on. I. Some observations on the distribution and cultivation of leptospirae..... 343
Linton, Richard W., Rosebury, Theodor, and Buchbinder, Leon. A comparative study of dental aciduric organisms and *Lactobacillus acidophilus*. 395

Microörganisms, A contribution to the classification of, of the class Schizomycetes..... 361
Milk, Studies on oxidation-reduction in. I. Oxidation-reduction potentials and the mechanism of reduction..... 293
——, Studies on oxidation-reduction in. II. The choice of an indicator for the reduction test. The reduction of janus green B in milk..... 319
——, The reduction of janus green B in. Studies on oxidation-reduction in milk. II. The choice of an indicator for the reduction test..... 319
Morishita, Toshiki. Studies on dental caries, with special reference to aciduric organisms associated with this process..... 181

Moriwaki, George. The specificity of scarlatinal hemolytic streptococci..... 139
Moyer, Harvey V. A continuous method of culturing bacteria for chemical study..... 59

Note, A, on the application of Buchanan's formula to heat production in bacterial cultures..... 117

Observations on luminous bacteria..... 95
—— on some of the factors involved in filtration experiments..... 175
Ontogeny, The, of an organism isolated from malignant tumors..... 227
Oxidation-reduction in milk, Studies on. I. Oxidation-reduction potentials and the mechanism of reduction..... 293
—— —— —— ——, —— ——. II. The choice of an indicator for the reduction test. The reduction of janus green B in milk..... 319

Parsons, L. B., Sturges, W. S., and Drake, E. T. Quantitative aspects of the metabolism of anaerobes..... 157
Plastridge, Wayne N., and Rettger, Leo F. Studies on carbon dioxide. IV. The influence of gaseous environment on growth and toxin production of *C. diphtheriae*..... 1
—— and ——. Studies on carbon dioxide. V. The mechanism responsible for the preserving action of carbon dioxide on diphtheria toxin..... 101
Pribram, Ernst. A contribution to the classification of microörganisms of the class Schizomycetes..... 361

Quantitative aspects of the metabolism of anaerobes..... 157
Quick, Armand J., and Kahn, Morton C. The fermentation of glycuronic acid by certain bacteria..... 133

Rahn, Otto. The decreasing rate of fermentation..... 207
——. The fermentometer..... 199
Rapid, A, method for obtaining the Voges-Proskauer reaction..... 93
Reduction, Oxidation-reduction potentials and the mechanism of. Studies on oxidation-reduction in milk. I..... 293
Reduction-test, The choice of an indicator for the. The reduction of janus green B in milk. Studies on oxidation-reduction in milk. II..... 319
Relative, The, thermal death rates of young and mature bacterial cells..... 333
Rettger, Leo F , and Plastridge, Wayne N. Studies on carbon dioxide. IV. The influence of gaseous environment on growth and toxin production of *C. diphtheriae*..... 1
—— and ——. Studies on carbon dioxide. V. The mechanism responsible for the preserving action of carbon dioxide on diphtheria toxin..... 101
Rosebury, Theodor, Linton, Richard W., and Buchbinder, Leon. A comparative study of dental aciduric organisms and *Lactobacillus acidophilus*..... 395

Sanborn, J. R., and Hamilton, W. B. The influence of *Azotobacter chroococcum* upon the physiological activities of cellulose destroyers..... 169

Scarlatinal hemolytic streptococci, The specificity of 139
Schizomycetes, A contribution to the classification of microörganisms of the class 361
Shoup, Charles S., and Hill, Samuel E. Observations on luminous bacteria ... 95
Sodium chloride media for the separation of certain Gram-positive cocci from Gram-negative bacilli 43
——, The influence upon bacterial viability of various anions in combination with 265
Specificity, The, of scarlatinal hemolytic streptococci 139
Stark, C. N., and Stark, Pauline. The relative thermal death rates of young and mature bacterial cells 333
Stearn, A. E., Stearn, E. W., and Sturdivant, B. F. The ontogeny of an organism isolated from malignant tumors 227
Stearn, E. W., Sturdivant, B. F., and Stearn, A. E. The ontogeny of an organism isolated from malignant tumors 227
Studies on carbon dioxide. IV. The influence of gaseous environment on growth and toxin production of *C. diphtheriae* 1
—— —— ——. V. The mechanism responsible for the preserving action of carbon dioxide on diphtheria toxin 101
—— on dental caries, with special reference to aciduric organisms associated with this process 181
—— on leptospirae. I. Some observations on the distribution and cultivation of leptospirae 343
—— on oxidation-reduction in milk. I. Oxidation-reduction potentials and the mechanism of reduction 293
—— —— —— —— —— ——. II. The choice of an indicator for the reduction test. The reduction of janus green B in milk 319
Sturdivant, B. F., Stearn, E. W., and Stearn, A. E. The ontogeny of an organism isolated from malignant tumors 227
Sturges, W. S., Parsons, L. B., and Drake, E. T. Quantitative aspects of the metabolism of anaerobes 157

Thornton, H. R., and Hastings, E. G. Studies on oxidation-reduction in milk. I. Oxidation-reduction potentials and the mechanism of reduction 293
—— and ——. Studies on oxidation-reduction in milk. II. The choice of an indicator for the reduction test. The reduction of janus green B in milk .. 319
Tumors, malignant, The ontogeny of an organism isolated from 227

Voges-Proskauer reaction, A rapid method for obtaining the 93

Wetzel, Norman C. A note on the application of Buchanan's formula to heat production in bacterial cultures 117
White, Edwin C., and Hill, Justina H. Sodium chloride media for the separation of certain Gram-positive cocci from Gram-negative bacilli 43
Winslow, C.-E. A., and Fabian, Frederick William. The influence upon bacterial viability of various anions in combination with sodium 265
